Dialogue 2

Developmental Disability: Unique Challenges for Research

Jeffrey P. Brosco, M.D., Ph.D., and Kenneth W. Goodman, Ph.D.
University of Miami

12 Noon, Friday, November 10, 2006
Mailman Center for Child Development, Room 3023

Lunch will be provided
(No RSVPs required)

Improving care of and services for people with disabilities is and ought to remain a high moral priority. This bold-face obligation can be a challenge to meet, especially in the case of children with developmental disability. Historical insight and current discrimination provide some of the context for understanding why human subjects research is more complicated in persons with developmental disability. Nevertheless, mental retardation does not automatically disqualify someone from being competent to make health care decisions – or provide consent for research.

Dr. Brosco is Associate Professor of Clinical Pediatrics and Director of Clinical Services, as well as Adjunct Associate Professor of History. Dr. Goodman is Associate Professor of Medicine and Philosophy and Co-Director of UM’s Ethics Programs, where he directs the Bioethics Program.

Dialogues in Research Ethics is a series of monthly conferences. For more information, phone UM Ethics Programs at 305-243-5723 or send E-mail to ethics@miami.edu.
