Dialogue 1

Police Powers and Epidemics: HIV as a Case Study

Dwayne C. Turner, Ph.D., J.D., M.P.H.
Broward County Health Department

12 p.m., Friday, September 3, 2010
RMSB, 4th Floor Auditorium

Recent research has demonstrated the potential utility of testing and early treatment on the rate of new HIV infections. Moreover, noncompliance may lead to an increase in resistant HIV strains. This means that a lack of access to treatment and treatment noncompliance may have consequences for HIV-infected individuals as well as for those at risk of becoming infected. In this Dialogue, we will consider the implications of recent research and explore some of the ethical challenges posed by various strategies for containing the HIV epidemic.

Dr. Turner is the Communicable Disease Director for the Broward County Health Department and a member of Florida’s Public Health Ethics Workgroup. He has also served as the Deputy General Counsel and Chief Privacy Officer for the New York City Department of Health and Mental Hygiene, Chief Executive Officer for A.G. Holley State Hospital, Executive Director for the New York State Task Force on Life and the Law and Associate Director of Planning for AIDS Project Los Angeles. His publications include a book on risky sexual behaviors and HIV infection.

Dialogues in Research Ethics is a series of monthly conferences. For more information, phone UM Ethics Programs at 305-243-5723 or send E-mail to ethics@miami.edu.
