To connect an Xbox, Playstation 3, or Wii, you will first need to register its Media Access Control (MAC) address with UM which will then be automatically linked to your CaneID.

It is recommended that you use an Ethernet (wired) connection for your Playstation 3 and Xbox Game Consoles.

Some devices that use a lower data rate such as the Nintendo Wii Game Console cannot connect to the standard wireless network (WirelessCanes). To connect the Wii the network you will need to use a secondary wireless network that is hidden (CaneGames).

Instructions for finding your MAC address on common devices are on the next page. Once you obtain your MAC address, you will need to apply for CaneNet and Wireless Access on CaneLink. This quick start guide will walk you through the steps to get connected!

**Hours:**  
Monday - Friday from 8 A.M. to 6 P.M.
Finding the Game Console’s MAC Address

Each game console is a little bit different so below please find instructions for many of the common game consoles. You will need to register the MAC address of the game console in order to use either a wired or wireless connection.

Finding the MAC address on Xbox 360
Please note that only the wired connection is supported on campus
1. From the Xbox Dashboard, select ‘Settings’.
2. Select ‘System’, then select ‘Network Settings’.
3. Select ‘Wired Network’ then select ‘Configure Network’.
5. This screen will display your Xbox 360’s MAC address.

Finding the MAC address on Playstation 3
Please note that only the wired connection is supported on campus
1. From the PS3 main startup screen (XMB), select ‘Settings’.
2. Select ‘Network Settings’.
3. Select ‘Settings and Connection Status List’.
4. This screen will display your PS3’s wired MAC address.

Finding the MAC address on Wii
Please note that only the wireless connection is supported on campus
1. From the Wii Channel menu, select ‘Wii Options’ (the round button on the bottom-left of the screen with Wii on it).
2. Select ‘Wii Settings’.
3. Select ‘Internet’.
4. Select ‘Console information’.
5. The MAC address of the Wii console is displayed on the first line.

Register Your Game Console with UM

1. Go to https://canelink.miami.edu
2. If you have already obtained a CaneID and password, please enter it here. If you do not know your CaneID username, please click on First time using CaneID and follow the prompts to create a CaneID.
3. After logging in, under the “Personal” section please select “CaneNet and Wireless Access.” Select Continue when prompted to access the Application for Network Access page.
4. In the Student Application for Network Access webpage, enter your MAC address for your Ethernet and/or Wireless network card, (refer to Finding The Game Console’s MAC Address on the previous page). You are allowed to enter up to six MAC addresses for WirelessCanes wireless access and up to two MAC addresses for CaneNet wired access.
5. Read the Student Usage Policy Agreement & Regulations and select the box agreeing to abide by the University's policies.
6. Click on Submit Changes to confirm your request.
7. You will then receive a confirmation message. Please reboot and wait a few minutes for changes to take effect.

Configure Your Game Console

If your game console provides an Ethernet port for connection to a wired network, it is highly recommended that you use this option to connect to the UM wired network (CaneNet). This will ensure the fastest connection and provide the best results for gaming.

If your game console can only connect via wireless, you can still use it on the UM network.

Each game console is a bit different. It is recommended that you follow the manufacturer’s instructions to configure the device.

Xbox 360 Manufacturer’s Instructions:
Please remember to register the wired MAC address

Playstation 3 Manufacturer’s Instructions:
Wired: http://us.playstation.com/support/answer/index.htm?a_id=977
Please remember to register the wired MAC address

Wii Manufacturer’s Instructions:
Wired: Not supported by manufacturer without additional equipment
Wireless: http://www.nintendo.com/
SSID: CaneGames (no security key or password required)
Please remember to register the wireless MAC address
